

Datasheet for taboo-ratings-raw.csv

Raw data by Aella, as Kink Taboo Ratings (v3)

Russell Luchin

April 25, 2024

Motivation

1. *For what purpose was the dataset created? Was there a specific task in mind? Was there a specific gap that needed to be filled? Please provide a description.*
 - Dataset was created to gauge opinions of close to 50 different sex acts, of varying controversy, using a scale of 0-5 (where 0 is uncontroversial and 5 is extremely taboo).
2. *Who created the dataset (for example, which team, research group) and on behalf of which entity (for example, company, institution, organization)?*
 - Dataset was created by Aella, unknown if she received assistance but assumed to be independent.
3. *Who funded the creation of the dataset? If there is an associated grant, please provide the name of the grantor and the grant name and number.*
 - Self funded by Aella
4. *Any other comments?*
 - No

Composition

1. *What do the instances that comprise the dataset represent (for example, documents, photos, people, countries)? Are there multiple types of instances (for example, movies, users, and ratings; people and interactions between them; nodes and edges)? Please provide a description.*
 - Instances comprise of people, with each row in the dataset being an individual respondent to the original survey.
2. *How many instances are there in total (of each type, if appropriate)?*

- One type of instance (people), around 48,000 total instances
3. *Does the dataset contain all possible instances or is it a sample (not necessarily random) of instances from a larger set? If the dataset is a sample, then what is the larger set? Is the sample representative of the larger set (for example, geographic coverage)? If so, please describe how this representativeness was validated/verified. If it is not representative of the larger set, please describe why not (for example, to cover a more diverse range of instances, because instances were withheld or unavailable).*
 - All possible instances.
 4. *What data does each instance consist of? “Raw” data (for example, unprocessed text or images) or features? In either case, please provide a description.*
 - Consists of metadata from Google Forms, a single self-identifier (age), and the question asked (with score given) followed by the associated variable to the question (also with score, making including the original question redundant)
 5. *Is there a label or target associated with each instance? If so, please provide a description.*
 - selfage variable, which is the self-identified age of the respondent. Dataset also includes some gendered identifiers, but due to the overwhelmingly cis male responses it loses the characteristic of being an a useful identifier (as most of the responses are from cis males)
 6. *Is any information missing from individual instances? If so, please provide a description, explaining why this information is missing (for example, because it was unavailable). This does not include intentionally removed information, but might include, for example, redacted text.*
 - Yes, several rows have a significant amount of “NA” or missing values in various spots. No rhyme or reason to them, likely due to “skip question” or similar being chosen in the original form.
 7. *Are relationships between individual instances made explicit (for example, users’ movie ratings, social network links)? If so, please describe how these relationships are made explicit.*
 - No
 8. *Are there recommended data splits (for example, training, development/validation, testing)? If so, please provide a description of these splits, explaining the rationale behind them.*
 - No
 9. *Are there any errors, sources of noise, or redundancies in the dataset? If so, please provide a description.*

- Yes, metadata creates an overwhelming amount of noise. Furthermore, the high proportion of “NA” responses makes some rows redundant.
10. *Is the dataset self-contained, or does it link to or otherwise rely on external resources (for example, websites, tweets, other datasets)? If it links to or relies on external resources, a) are there guarantees that they will exist, and remain constant, over time; b) are there official archival versions of the complete dataset (that is, including the external resources as they existed at the time the dataset was created); c) are there any restrictions (for example, licenses, fees) associated with any of the external resources that might apply to a dataset consumer? Please provide descriptions of all external resources and any restrictions associated with them, as well as links or other access points, as appropriate.*
- Self-contained
11. *Does the dataset contain data that might be considered confidential (for example, data that is protected by legal privilege or by doctor-patient confidentiality, data that includes the content of individuals’ non-public communications)? If so, please provide a description.*
- No
12. *Does the dataset contain data that, if viewed directly, might be offensive, insulting, threatening, or might otherwise cause anxiety? If so, please describe why.*
- Gauges opinion on controversial sex topics, so includes mention of sexual violence and pedophilia
13. *Does the dataset identify any sub-populations (for example, by age, gender)? If so, please describe how these subpopulations are identified and provide a description of their respective distributions within the dataset.*
- Yes, age and gender are self disclosed. Age is distributed mostly in the early 20s to mid 40s but ranges from age 14 to age 100; due to nature of self disclosure it is likely that some of these extreme ages are falsified. Gender is also disclosed, but overwhelming majority of respondents being cis males make data redundant rather than identifiable
14. *Is it possible to identify individuals (that is, one or more natural persons), either directly or indirectly (that is, in combination with other data) from the dataset? If so, please describe how.*
- No
15. *Does the dataset contain data that might be considered sensitive in any way (for example, data that reveals race or ethnic origins, sexual orientations, religious beliefs, political opinions or union memberships, or locations; financial or health data; biometric or genetic data; forms of government identification, such as social security numbers; criminal history)? If so, please provide a description.*

- Yes, but as the data has no significant personal identifiers the information can be considered anonymous. Data contains sexual orientation information by means of a Yes/No answer to being heterosexual.

16. *Any other comments?*

- No

Collection process

1. *How was the data associated with each instance acquired? Was the data directly observable (for example, raw text, movie ratings), reported by subjects (for example, survey responses), or indirectly inferred/derived from other data (for example, part-of-speech tags, model-based guesses for age or language)? If the data was reported by subjects or indirectly inferred/derived from other data, was the data validated/verified? If so, please describe how.*
 - Data was collected remotely through a Google Form disseminated through the social media platform X (formerly known as Twitter). Answers were inputted into the Google Form.
2. *What mechanisms or procedures were used to collect the data (for example, hardware apparatuses or sensors, manual human curation, software programs, software APIs)? How were these mechanisms or procedures validated?*
 - Data was collected remotely through a Google Form disseminated through the social media platform X (formerly known as Twitter).
3. *If the dataset is a sample from a larger set, what was the sampling strategy (for example, deterministic, probabilistic with specific sampling probabilities)?*
 - N/A
4. *Who was involved in the data collection process (for example, students, crowdworkers, contractors) and how were they compensated (for example, how much were crowdworkers paid)?*
 - No one, data was collected remotely with no human oversight.
5. *Over what timeframe was the data collected? Does this timeframe match the creation timeframe of the data associated with the instances (for example, recent crawl of old news articles)? If not, please describe the timeframe in which the data associated with the instances was created.*
 - Unknown
6. *Were any ethical review processes conducted (for example, by an institutional review board)? If so, please provide a description of these review processes, including the outcomes, as well as a link or other access point to any supporting documentation.*

- No
7. *Did you collect the data from the individuals in question directly, or obtain it via third parties or other sources (for example, websites)?*
 - Collected from individuals directly by means of Google Form.
 8. *Were the individuals in question notified about the data collection? If so, please describe (or show with screenshots or other information) how notice was provided, and provide a link or other access point to, or otherwise reproduce, the exact language of the notification itself.*
 - Yes, they consented to having their data collected by responding to the Google Form.
 9. *Did the individuals in question consent to the collection and use of their data? If so, please describe (or show with screenshots or other information) how consent was requested and provided, and provide a link or other access point to, or otherwise reproduce, the exact language to which the individuals consented.*
 - Yes, they consented to having their data collected by responding to the Google Form.
 10. *If consent was obtained, were the consenting individuals provided with a mechanism to revoke their consent in the future or for certain uses? If so, please provide a description, as well as a link or other access point to the mechanism (if appropriate).*
 - No
 11. *Has an analysis of the potential impact of the dataset and its use on data subjects (for example, a data protection impact analysis) been conducted? If so, please provide a description of this analysis, including the outcomes, as well as a link or other access point to any supporting documentation.*
 - No
 12. *Any other comments?*
 - No

Preprocessing/cleaning/labeling

1. *Was any preprocessing/cleaning/labeling of the data done (for example, discretization or bucketing, tokenization, part-of-speech tagging, SIFT feature extraction, removal of instances, processing of missing values)? If so, please provide a description. If not, you may skip the remaining questions in this section.*
 - No

2. *Was the “raw” data saved in addition to the preprocessed/cleaned/labeled data (for example, to support unanticipated future uses)? If so, please provide a link or other access point to the “raw” data.*
 - Yes, there is only raw data.
3. *Is the software that was used to preprocess/clean/label the data available? If so, please provide a link or other access point.*
 - N/A
4. *Any other comments?*
 - No

Uses

1. *Has the dataset been used for any tasks already? If so, please provide a description.*
 - Yes, data has been used by Aella for her personal blog posts and visualization projects.
2. *Is there a repository that links to any or all papers or systems that use the dataset? If so, please provide a link or other access point.*
 - No
3. *What (other) tasks could the dataset be used for?*
 - None, due to the nature of the data collection.
4. *Is there anything about the composition of the dataset or the way it was collected and preprocessed/cleaned/labeled that might impact future uses? For example, is there anything that a dataset consumer might need to know to avoid uses that could result in unfair treatment of individuals or groups (for example, stereotyping, quality of service issues) or other risks or harms (for example, legal risks, financial harms)? If so, please provide a description. Is there anything a dataset consumer could do to mitigate these risks or harms?*
 - Yes, data was collected by means which had no controls for authenticity and disseminated through a social media platform which invites significant bias.
5. *Are there tasks for which the dataset should not be used? If so, please provide a description.*
 - Serious academic research, due to fundamental flaws in data collection process.
6. *Any other comments?*
 - No

Distribution

1. *Will the dataset be distributed to third parties outside of the entity (for example, company, institution, organization) on behalf of which the dataset was created? If so, please provide a description.*
 - Yes, the data was hosted on Aella's personal website Knowingless.
2. *How will the dataset be distributed (for example, tarball on website, API, GitHub)? Does the dataset have a digital object identifier (DOI)?*
 - Link to Google Sheets on the Knowingless website.
3. *When will the dataset be distributed?*
 - Already distributed.
4. *Will the dataset be distributed under a copyright or other intellectual property (IP) license, and/or under applicable terms of use (ToU)? If so, please describe this license and/ or ToU, and provide a link or other access point to, or otherwise reproduce, any relevant licensing terms or ToU, as well as any fees associated with these restrictions.*
 - Unknown; likely a Creative Commons license.
5. *Have any third parties imposed IP-based or other restrictions on the data associated with the instances? If so, please describe these restrictions, and provide a link or other access point to, or otherwise reproduce, any relevant licensing terms, as well as any fees associated with these restrictions.*
 - No
6. *Do any export controls or other regulatory restrictions apply to the dataset or to individual instances? If so, please describe these restrictions, and provide a link or other access point to, or otherwise reproduce, any supporting documentation.*
 - No
7. *Any other comments?*
 - No

Maintenance

1. *Who will be supporting/hosting/maintaining the dataset?*
 - Aella will be hosting this dataset; unlikely to be maintained as the Google Form has been closed since data collection ended.
2. *How can the owner/curator/manager of the dataset be contacted (for example, email address)?*

- Aella can be contacted through her PR coordinator at sasha.c.whitt@gmail.com
3. *Is there an erratum? If so, please provide a link or other access point.*
 - No
 4. *Will the dataset be updated (for example, to correct labeling errors, add new instances, delete instances)? If so, please describe how often, by whom, and how updates will be communicated to dataset consumers (for example, mailing list, GitHub)?*
 - No
 5. *If the dataset relates to people, are there applicable limits on the retention of the data associated with the instances (for example, were the individuals in question told that their data would be retained for a fixed period of time and then deleted)? If so, please describe these limits and explain how they will be enforced.*
 - No
 6. *Will older versions of the dataset continue to be supported/hosted/maintained? If so, please describe how. If not, please describe how its obsolescence will be communicated to dataset consumers.*
 - Yes, prior version of Kink Taboo Ratings are available for download.
 7. *If others want to extend/augment/build on/contribute to the dataset, is there a mechanism for them to do so? If so, please provide a description. Will these contributions be validated/verified? If so, please describe how. If not, why not? Is there a process for communicating/distributing these contributions to dataset consumers? If so, please provide a description.*
 - No
 8. *Any other comments?*
 - No
